

# GRAFFITI SHIELD<sup>INC.</sup>

HOLISTIC APPROACH TO GRAFFITI CONTROL

**Graffiti Shield Removal Procedure**

## Graffiti Shield Removal Instructions:

### Minimum Tools Needed:

Spray Bottle GST-0022

Dishwashing Detergent (Palmolive/Ivory/Joy)

Paper Towels (Lint Free)

6" Triumph Scraper GST-0010 (for best results)

Scrub Pad GST-0016

Orange Base Solvent Cleaner

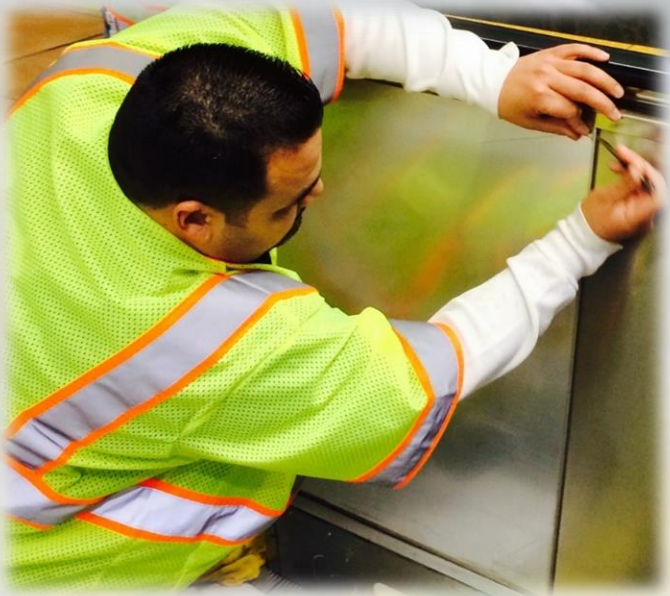

## Glass Shield and Mirror Shield Removal:

- Pull back a corner and pull the film slow and at the same angle.
- Maintain same even pull all the way until all material is removed.
- If any adhesive is left, then spray with soap water (3-4 drop dishwashing detergent per 32oz) and soak adhesive.
- Once adhesive has absorbed the soap water, then use a 6" Triumph scraper to remove adhesive.
- Note that if your removing film off Polycarbonate or plastic windows. DO NOT USE A BLADE. Only use scrub pad. But test a small area to confirm the adhesive will remove without damaging surface.

## Metal Shield and Custom Shield Removal:

- Pull back a corner and pull the film slow and at the same angle.
- Maintain same even pull all the way until all material is removed.
- If any adhesive is left, then spray with soap water (3-4 drops dishwashing detergent per 32oz) and soak adhesive.
- Once adhesive has absorbed the soap water, then use a white scrub pad and remove adhesive.
- If adhesive will not remove, then use a orange based adhesive remover with white scrub pad.
